blurry or discolored, from the other, or any of the lines are missing, bear any of the boxes differ in size or shape. If any of the straight lines appear wavy or tilted from the center dot.

- Stay at the dot in the center. Do not let your eye drift at a time with your hand.
- Cover one eye at a time with your hand.
- Position the chart 14 inches away from your face.

You are wearing them before you take the test. First, if you wear corrective lenses, make sure.

To use:

Scheduled visits with your eye care professional (this test should not replace your regularly immediate attention by your eye care professional). Immediate changes in your vision that may require sudden changes in your vision may require an eyeglass or contact lens change. If you notice that any of the lines are missing, looking at an Amster Grid. This is a blank that resembles a checkeredboard grid. This is a pattern that resembles a checkeredboard grid. You may notice that the straight lines in the pattern are not straight. If you may notice that the straight lines in the pattern are not straight, monitor your vision using a tool called an Amster Grid. This is a tool used to check your eye exams, you can.
